P R O D U C T I O N

The company has factories equipped with modern machine parks, its own transportation, logistics, and warehouses. The total warehouse area is 8,600 square meters. Our production halls are equipped with top-of-the-line machinery and equipment, which form the basis of our operations. The production systems are fast and highly efficient, allowing us to carry out projects with precision and speed. We utilize the best aluminum profile processing machines available on the market. An automated production line enables us to implement individual and flexible designs. Over the years, we have gained knowledge and experience that have allowed us to build a professional company specializing in the production of pool enclosures

MANUFACTURER OF
POOL ENCLOSURE

A B O U T U S

WE ARE A FAMILY COMPANY

Bucovers
is a Polish manufacturer
of pool enclosures
and movable terrace structures

We have been present on the market since 1992

A
B
O
U
T
U
S

Bucovers is a renowned company specializing in the production of high-quality pool and terrace coverings. Our covers are designed to meet the highest standards of quality and aesthetics, providing not only protection from adverse weather conditions but also creating a unique atmosphere and functionality.

As a manufacturer of covers, we are constantly evolving and staying up-to-date with the latest trends in architecture and design. As industry innovators, we continuously strive for excellence, investing in state-of-the-art technologies and innovative solutions. Safety and durability of our enclosures are our top priorities, so you can be assured that choosing Bucovers means receiving a product of the highest quality.

We take pride in the fact that our enclosures adorn terraces and pools across Europe. Our presence is visible in various countries, and our satisfied customers serve as our best recommendation.

Our collaboration begins with listening to your needs and vision, followed by offering professional advice and design tailored to your preferences. Our passion for excellence and dedication to creating unique spaces are the foundation of our business.

Customer satisfaction is our greatest success.

Mean IN OUR OFF

We offer measuring, transport and installation services to all those who dream of a pool enclosure perfectly adapted to their needs – we will come and do all of this for you!

We will make the necessary measurements, we will check whether the ground is appropriately prepared for installation of the enclosure, and we will assess whether any modifications of the structure will be needed, such as: increase of the enclosure height due to the specific height of the pool frame or any ladder protruding above the pool, etc.

A B O U T U S

BUCOVERS

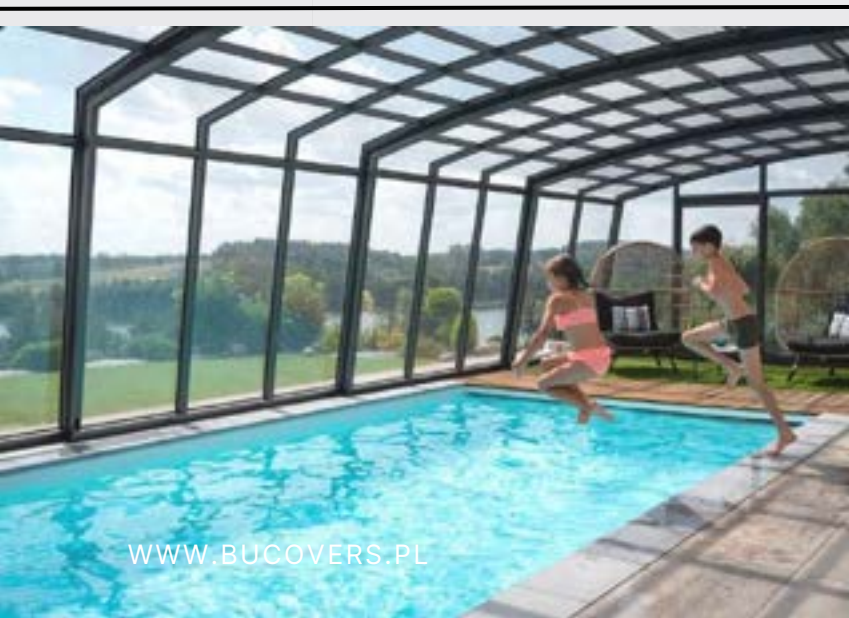

BUCOVERS

Design

Let your garden become the place where you'll want to spend most of your time this summer! Every model can be adapted to your pool size. However, if you do not find anything that suites your tastes, our designers can always suggest a structure that fits your needs better.

The pool enclosures that our company offers are picked individually. They are perfectly suited to everyone's needs and requirements, including the most demanding customers. We ensure you – every detail is considered so that every pool enclosure is designed just as it was dreamed up.

Installation

IN OUR OFFER...

Installation and Service

The pool enclosure manufacturer Bucovers ensures fully professional installation of the enclosures as part of own services. We are able to install enclosures on any base surface in the most difficult locations, and nothing is impossible to us. We will stand up to any challenge. Top-trained personnel and modern installation service equipment ensures high standard of installation services.

ABOUT US | 11

TranTrans

We provide comprehensive services, starting with measuring, through production and transport, all the way to enclosure installation. Our perfect organisation and specialised equipment allow us to send ca. 800 complete enclosure structures per year to many countries, such as Sweden, France, Croatia, Germany, Austria, the Netherlands, Denmark, Norway, Finland, etc. In order to ensure safe transport of the enclosures, we offer professional carriage of Bucovers products. The enclosure is protected against damage using special film and fixed on pallets, so that it reaches the customer safely. We operate our own truck and trailer fleet, thanks to which we can deliver our products quickly and efficiently.

The Bucovers brand has already gained recognition among numerous customers and recipients.

BUCOVERS

BUCOVERS

WHY IS IT WORTH IT TO CHOOSE BUCOVERS ENCLOSURES?

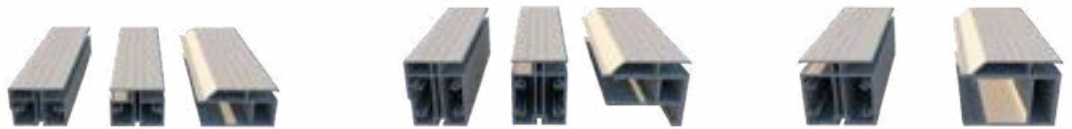

BUCOVERS

Structure

01

We offer 32 types of profiles made from certified aluminum alloy, with patented designs. These profiles are divided into 3 groups based on their strength and the size of the enclosures they produce.

Our Bucovers aluminum profiles are powder-coated. The coating hardening process occurs at temperatures ranging from 180 to 200 degrees Celsius. Under the influence of this temperature, the powder on the profile undergoes polymerization and takes on the form of paint. Profiles treated in this way are practically indestructible, resistant to moisture, and the effects of chemicals commonly used in pool water, such as chlorine or active oxygen.

Guide rails

02

The guide rails we use, are adapted exclusively to Bucovers enclosures. The rails will certainly provide comfort of use and are safe for children. Our offer encompasses three types of guide rails that we offer depending on the dimensions and weight of the enclosure. The XXL system is used for designs with a width exceeding seven metres.

Warranty

03

The manufacturer provides a two-year warranty covering the structure and installation of Bucovers enclosures. Top quality service with a long-term warranty! We are always available, whenever you call.

The polycarbonate holds a ten-year manufacturer warranty.

04

Profile colours

We offer three profile colours: DB 703 (Anthracite), RAL 9007 (Grey aluminium) and RAL 9004 (Signal black)

However, we are aware of just how important aesthetic considerations and adaptation to existing structures are, hence beside the standard profile colours you will also be able to choose the pool enclosure in any RAL colour.

05

Certified product - TÜV

Bucovers enclosures have passed strength and quality tests. Voluntary BQC Elements certification constitutes added value and a confirmation of the declared product properties.

Bucovers enclosures conform to all European usage as well as snow and wind load standards. They are durable and safe, and with their modern looks adapted to individual user needs, this makes them some of the best products on the demanding European market.

06

Filling

The fill material, channel polycarbonate, with a thickness of 8 mm, provides insulation and protects against heat loss; solid polycarbonate, another enclosure material, with a thickness of 4 mm, is manufactured by the world leader in this area – the Swedish company Arlaplast – and it provides unique protection against the damaging activity of UV light.

WHY IS IT WORTH IT TO CHOOSE BUCOVERS ENCLOSURES?

BUCOVERS

Equipment and locks

07

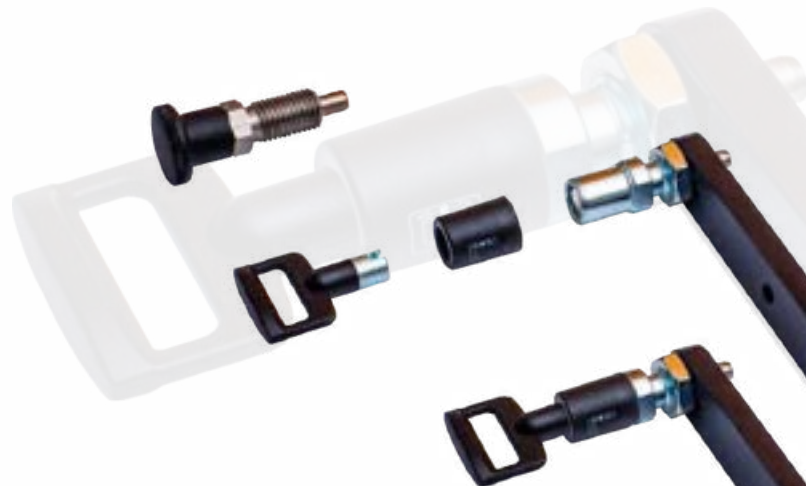

The fittings are made of stainless steel, and they guarantee safety against the elements and against increased humidity. The double wheels, on which roof sections freely roll, are specially designed for Bucovers, and the seals between the sections are the result of application of modern rubber product technologies. Our top priorities are the functionality, quality and aesthetics of our products, meaning – no visible installation components.

Cross-section

08

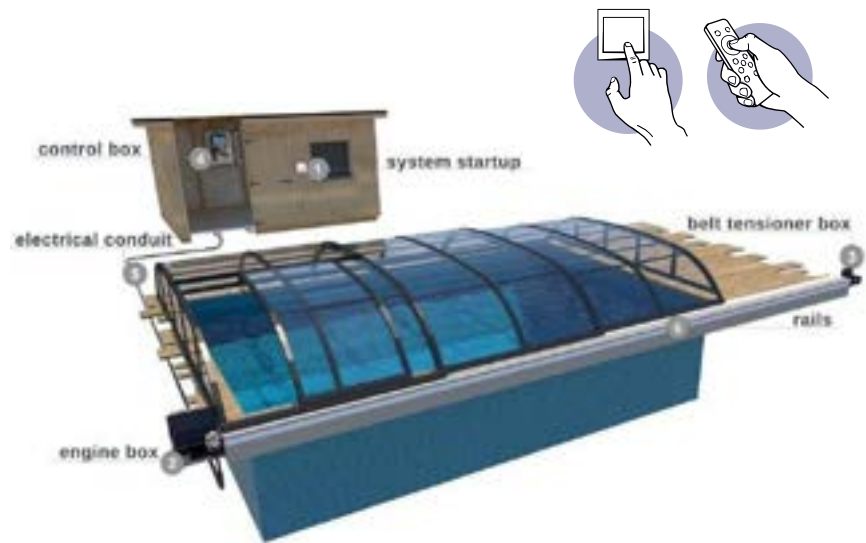

Our system is the only one that uses enclosure modules that slide over the guide rails on bogies; the bogies were designed with particular attention and precision by our designers. This is an innovative feature of our enclosures that contributes to the ease of sliding of the components.

09

Electric drive

We've developed an automatic enclosure sliding system just for you. This translates into tangible benefits, enhancing functionality and, most importantly, user convenience. The automation is integrated with a mobile app, allowing you to open or close the enclosure from anywhere in the world.

10

Modern insulation technology

We offer the most modern double module insulation system by Bucovers. It entails the usage of two rubber aprons, thanks to which our enclosure gets suitable insulation.

I N D I V I D U A L P R O J E C T S

BUCOVERS

Our range actually encompasses an infinite variety of enclosures, satisfying the full spectrum of customer needs. We understand your individual requirements and will tailor the design perfectly to your needs.
