EUROPOOL

Your own luxury pool

We are a Polish manufacturer of swimming pools that has been on the market since 2007. The main area of our activity is the production of a wide range of vinylester and polypropylene pools, which, thanks to many years of experience, are characterised by the highest quality. Our offer also includes enclosures, roller blinds, and pool covers, as well as pool technology.

We have over 30 models of fiberglass swimming pools; the shape and dimensions are adapted to the needs of our clients. We are the only Polish company which produces polypropylene pools with unlimited shapes of form dependent on the consumer's individual preferences. Our diversified portfolio of products makes even the most demanding customers satisfied.

One of the essential features of our company is striving for its continuous development. Years of experience in the pool industry have contributed to creation of **EuropoolSpa**, our line of unique and original spa tubs of the highest quality and style.

However, the product itself is not enough to satisfy customers' needs and we are fully aware of it. That is why we deal with the manufacturing and a comprehensive range of services from pool design through arrangement and transport.

Do you deserve luxury, pleasure and health?
Of course you do.

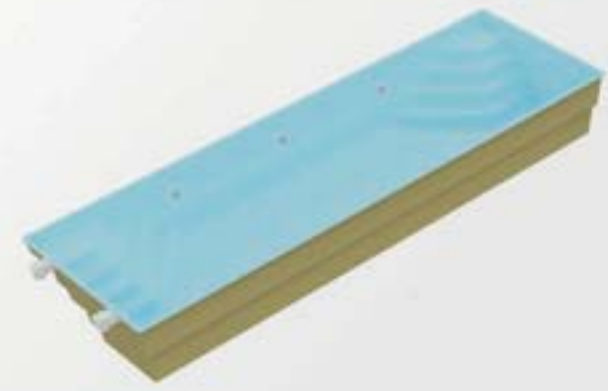

Europool
0120001

Your own luxury pool

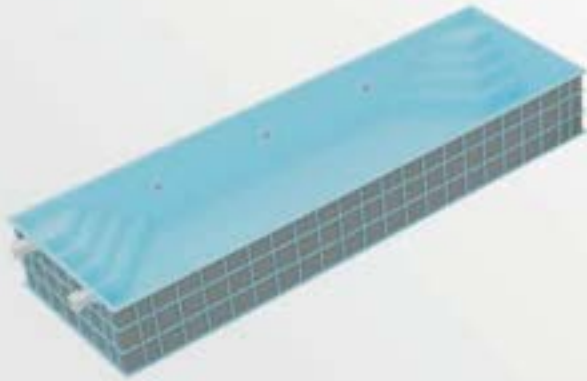

Fiberglass pools

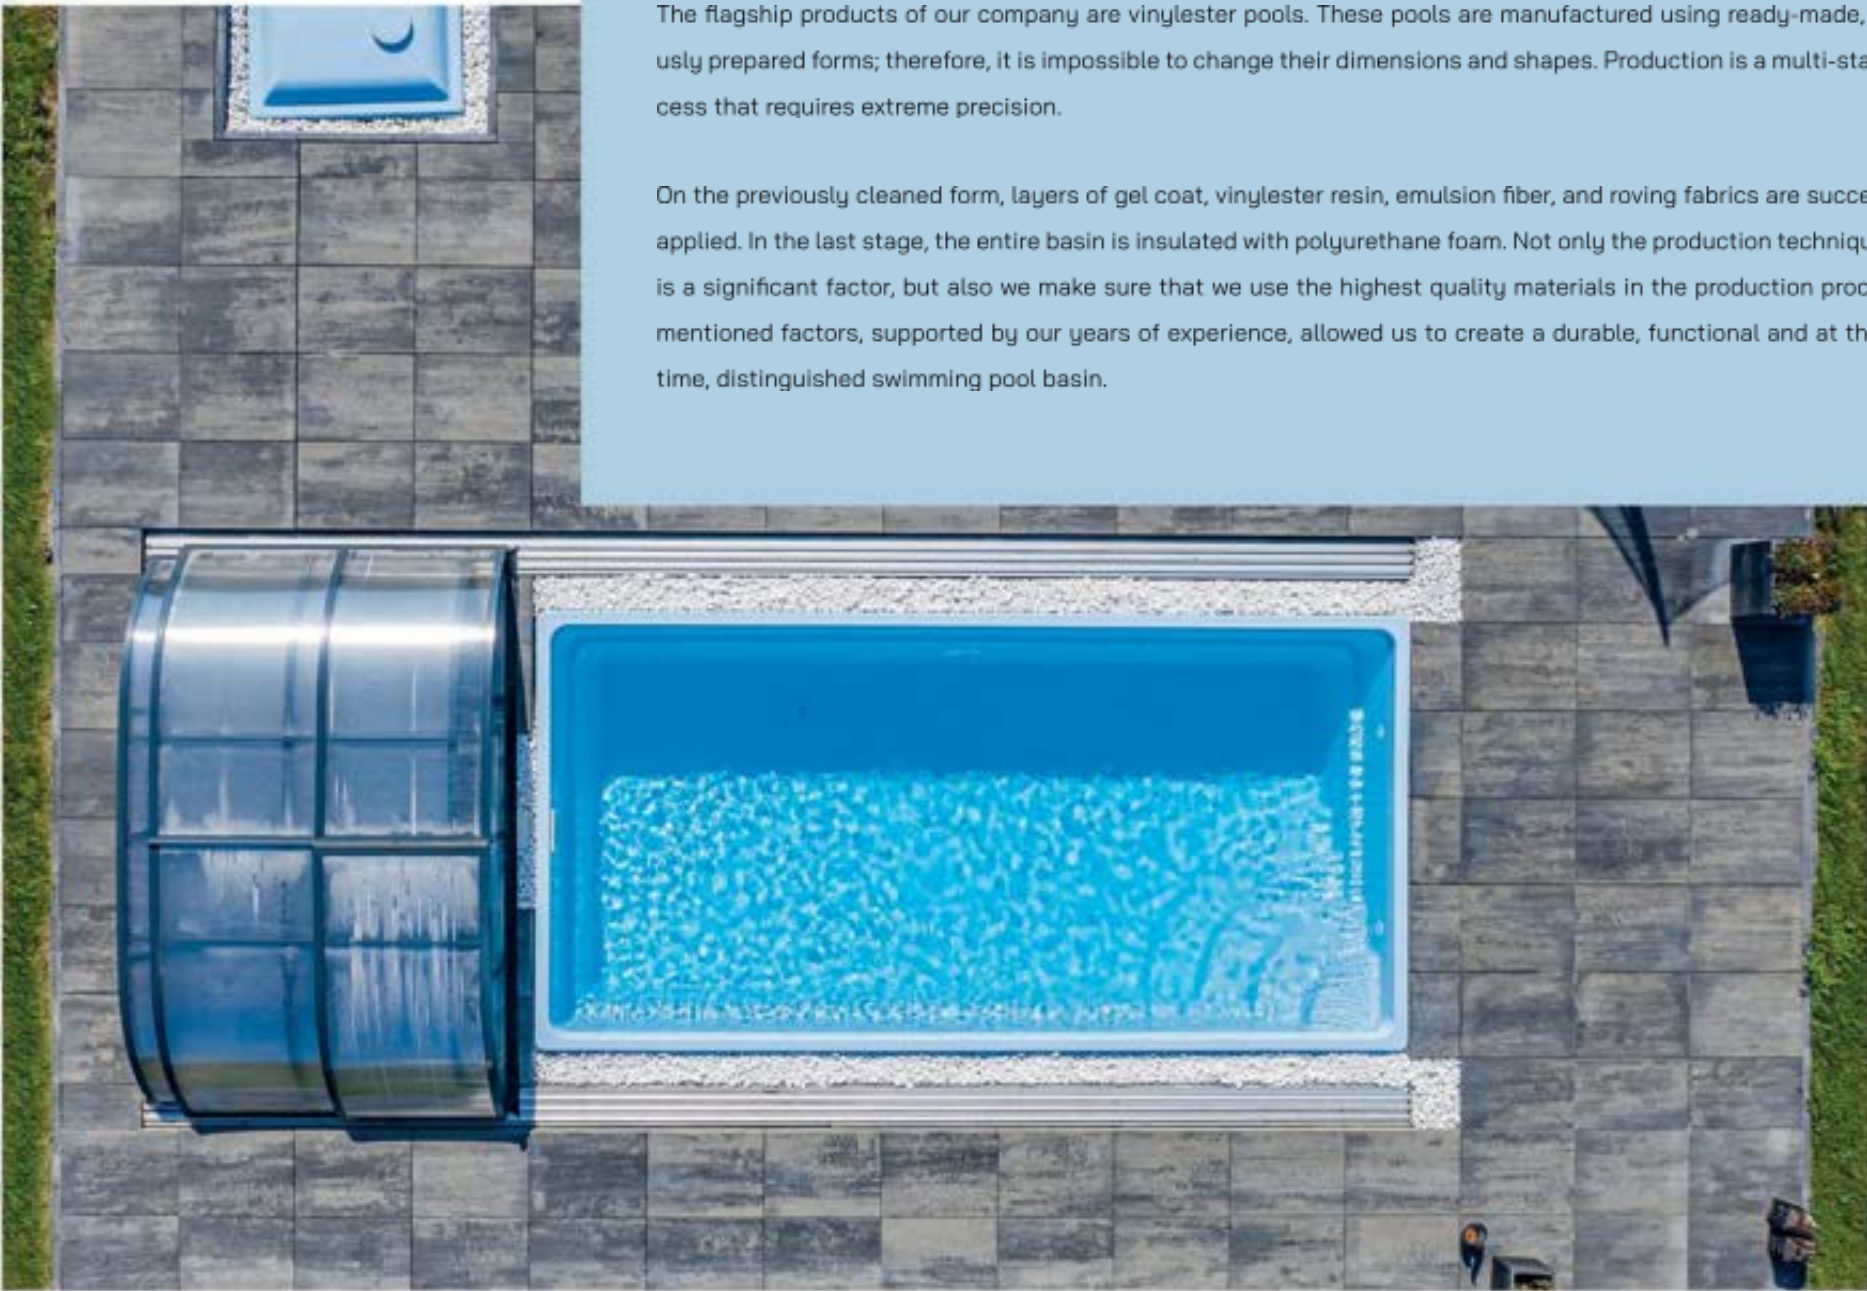

- ✓ made of a vinylester resin,
- ✓ possibility of heating water up to 30°C,
- ✓ can be made only in skimmer technology,
- ✓ solid colour,
- ✓ smooth surface,
- ✓ insulated with polyurethane foam,
- ✓ no possibility of changing the size and shape.

Polypropylene pools

- ✓ made of polypropylene plates with a thickness of 8 and 15mm, joined by diffusion welding,
- ✓ special temperature resistance from -20°C to 72°C,
- ✓ possibility of production in two technologies:
 - skimmer or overflow gutter
- ✓ the ability to combine colours,
- ✓ slightly perceptible welds,
- ✓ insulated with styrodur,
- ✓ possibility to create an individual design.

The flagship products of our company are vinylester pools. These pools are manufactured using ready-made, previously prepared forms; therefore, it is impossible to change their dimensions and shapes. Production is a multi-stage process that requires extreme precision.

On the previously cleaned form, layers of gel coat, vinylester resin, emulsion fiber, and roving fabrics are successively applied. In the last stage, the entire basin is insulated with polyurethane foam. Not only the production technique itself is a significant factor, but also we make sure that we use the highest quality materials in the production process. All mentioned factors, supported by our years of experience, allowed us to create a durable, functional and at the same time, distinguished swimming pool basin.

Your own luxury pool

Our offer includes pools made of polypropylene plates. The shape and size are not limited and depend on the customer's preferences. The highest quality material is used for this type of pool, characterised by high colour stability and protection against UV radiation.

The pools are made of solid polypropylene plates with high mechanical strength and resistance to weather conditions. PP plates are connected using the innovative technology of diffusion welding. The pool's surface is smooth, making it easier to clean the pool. Basin is reinforced on the outside with ribs made of the same material.

Advantages:

- ✓ possibility to create an individual design,
- ✓ possibility of production in two technologies:
skimmer or overflow gutter,
- ✓ higher resistance to high temperature,
- ✓ less prone to discoloration.

-  Dimension: 2,20 x 2,20 x 1,115
-  Volume: 4m³
-  Water surface area: 2,5m²
-  Weight: 650kg

- the housing available in several variants,
- can be heated, cooled or used as a Jacuzzi,
- integrated technology,
- long service life,
- free-standing with the option of installation,
- up to 12 massage jets can be installed.
- LED lamp

Your own luxury pool

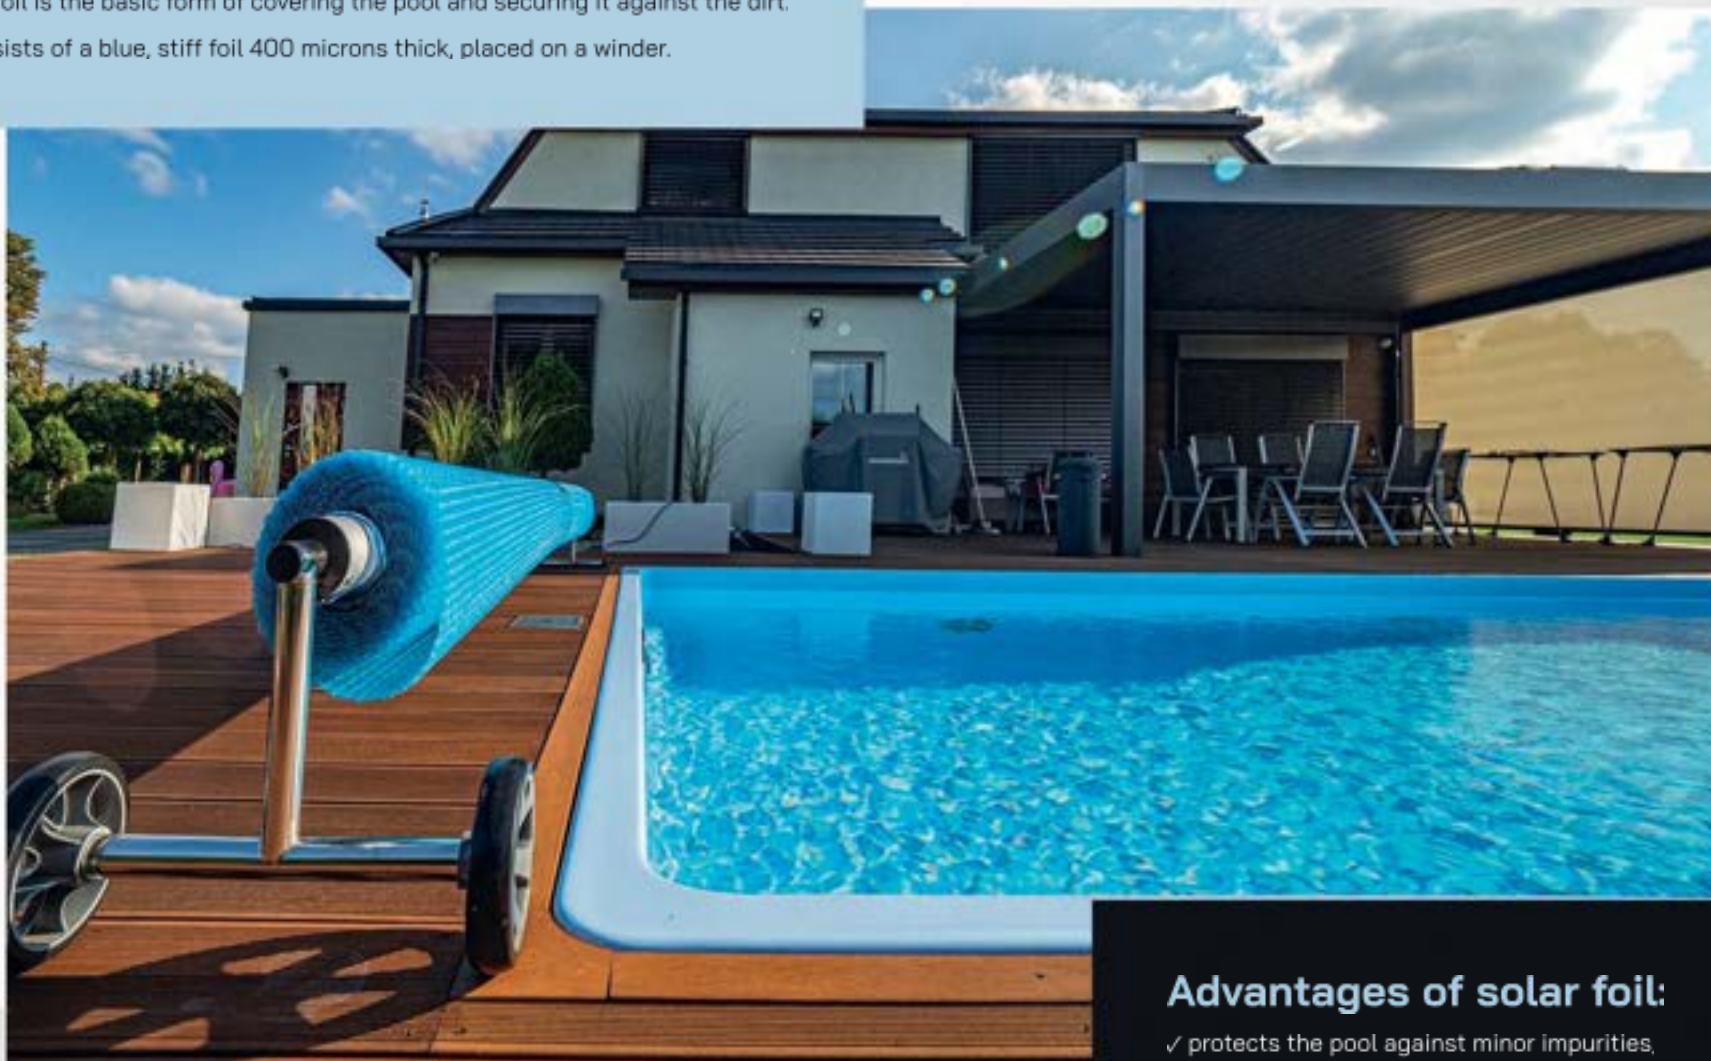

Polypropylene pools

Your own luxury pool

Solar foil

Solar foil is the basic form of covering the pool and securing it against the dirt. It consists of a blue, stiff foil 400 microns thick, placed on a winder.

Advantages of solar foil:

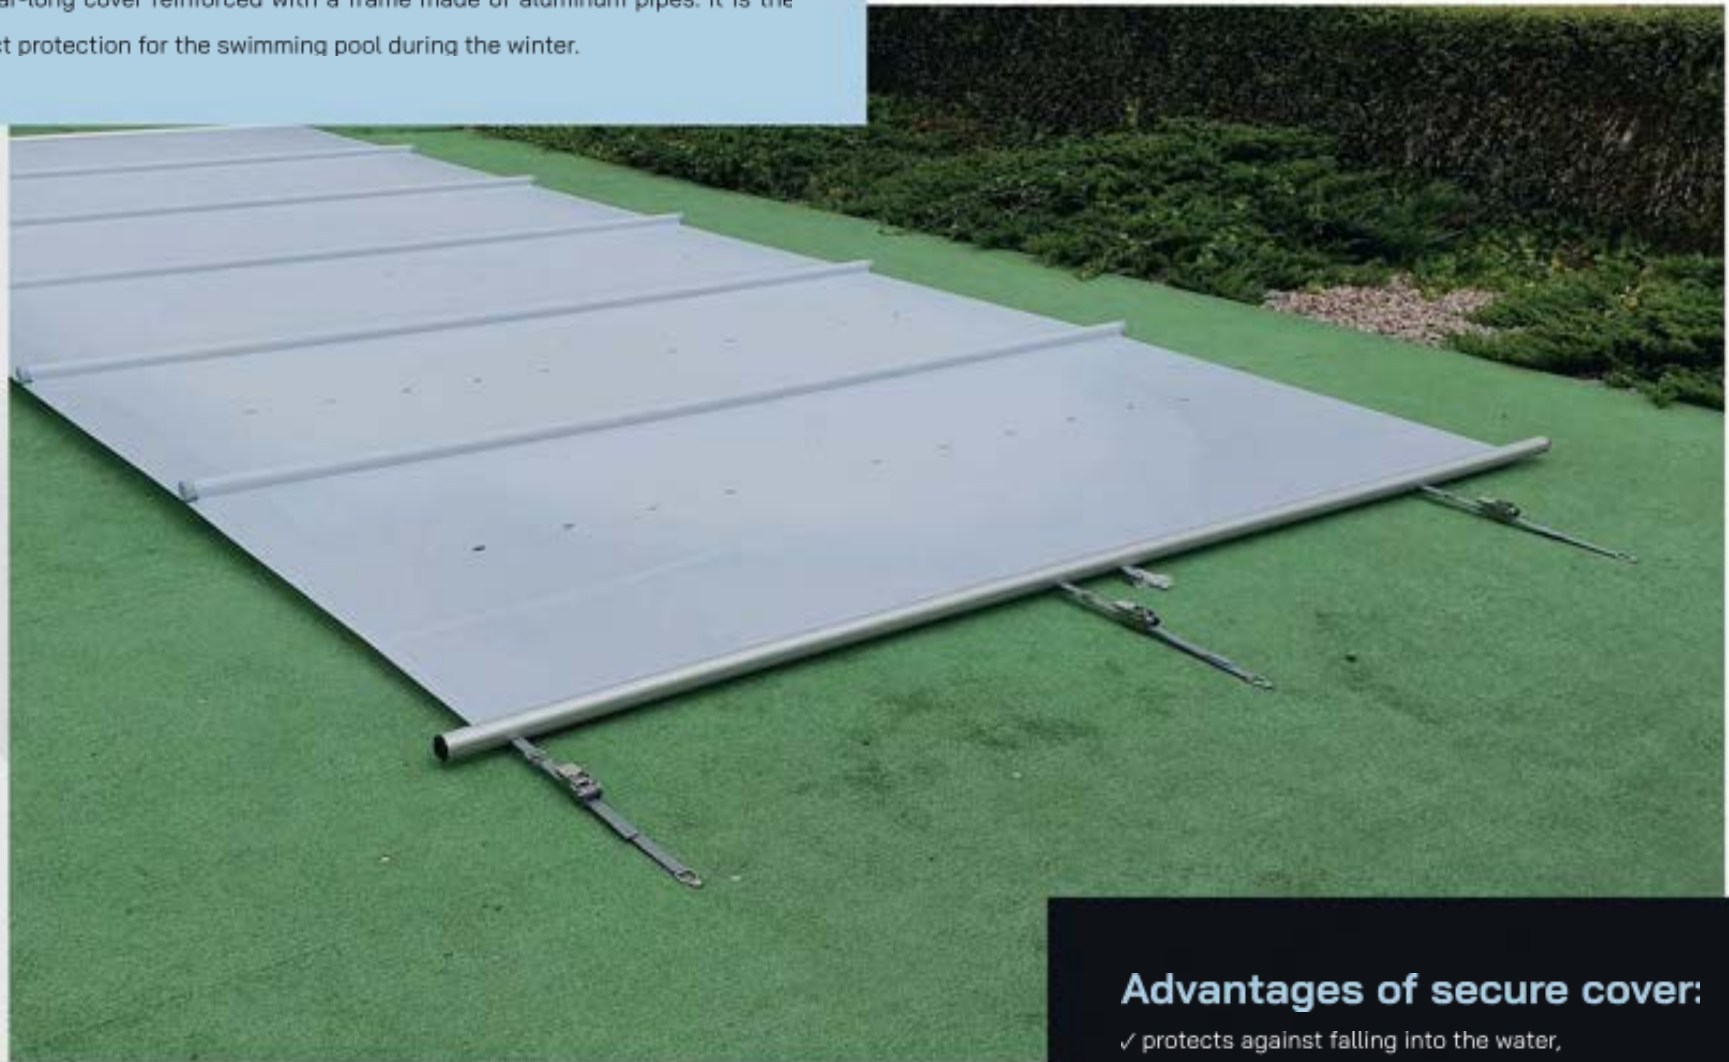

- ✓ protects the pool against minor impurities,
- ✓ reduces heat loss and evaporation,
- ✓ easy to use.

Colours available

Secure cover

All-year-long cover reinforced with a frame made of aluminum pipes. It is the perfect protection for the swimming pool during the winter.

Advantages of secure cover:

- ✓ protects against falling into the water,
- ✓ reduces water evaporation,
- ✓ secures the swimming pool for the winter period

Roller shutter

The roller blind is one of the most popular pool covers. It comes in two variants: a surface roller shutter and an underwater roller shutter, used in pools with a special built-in chamber where the device is installed.

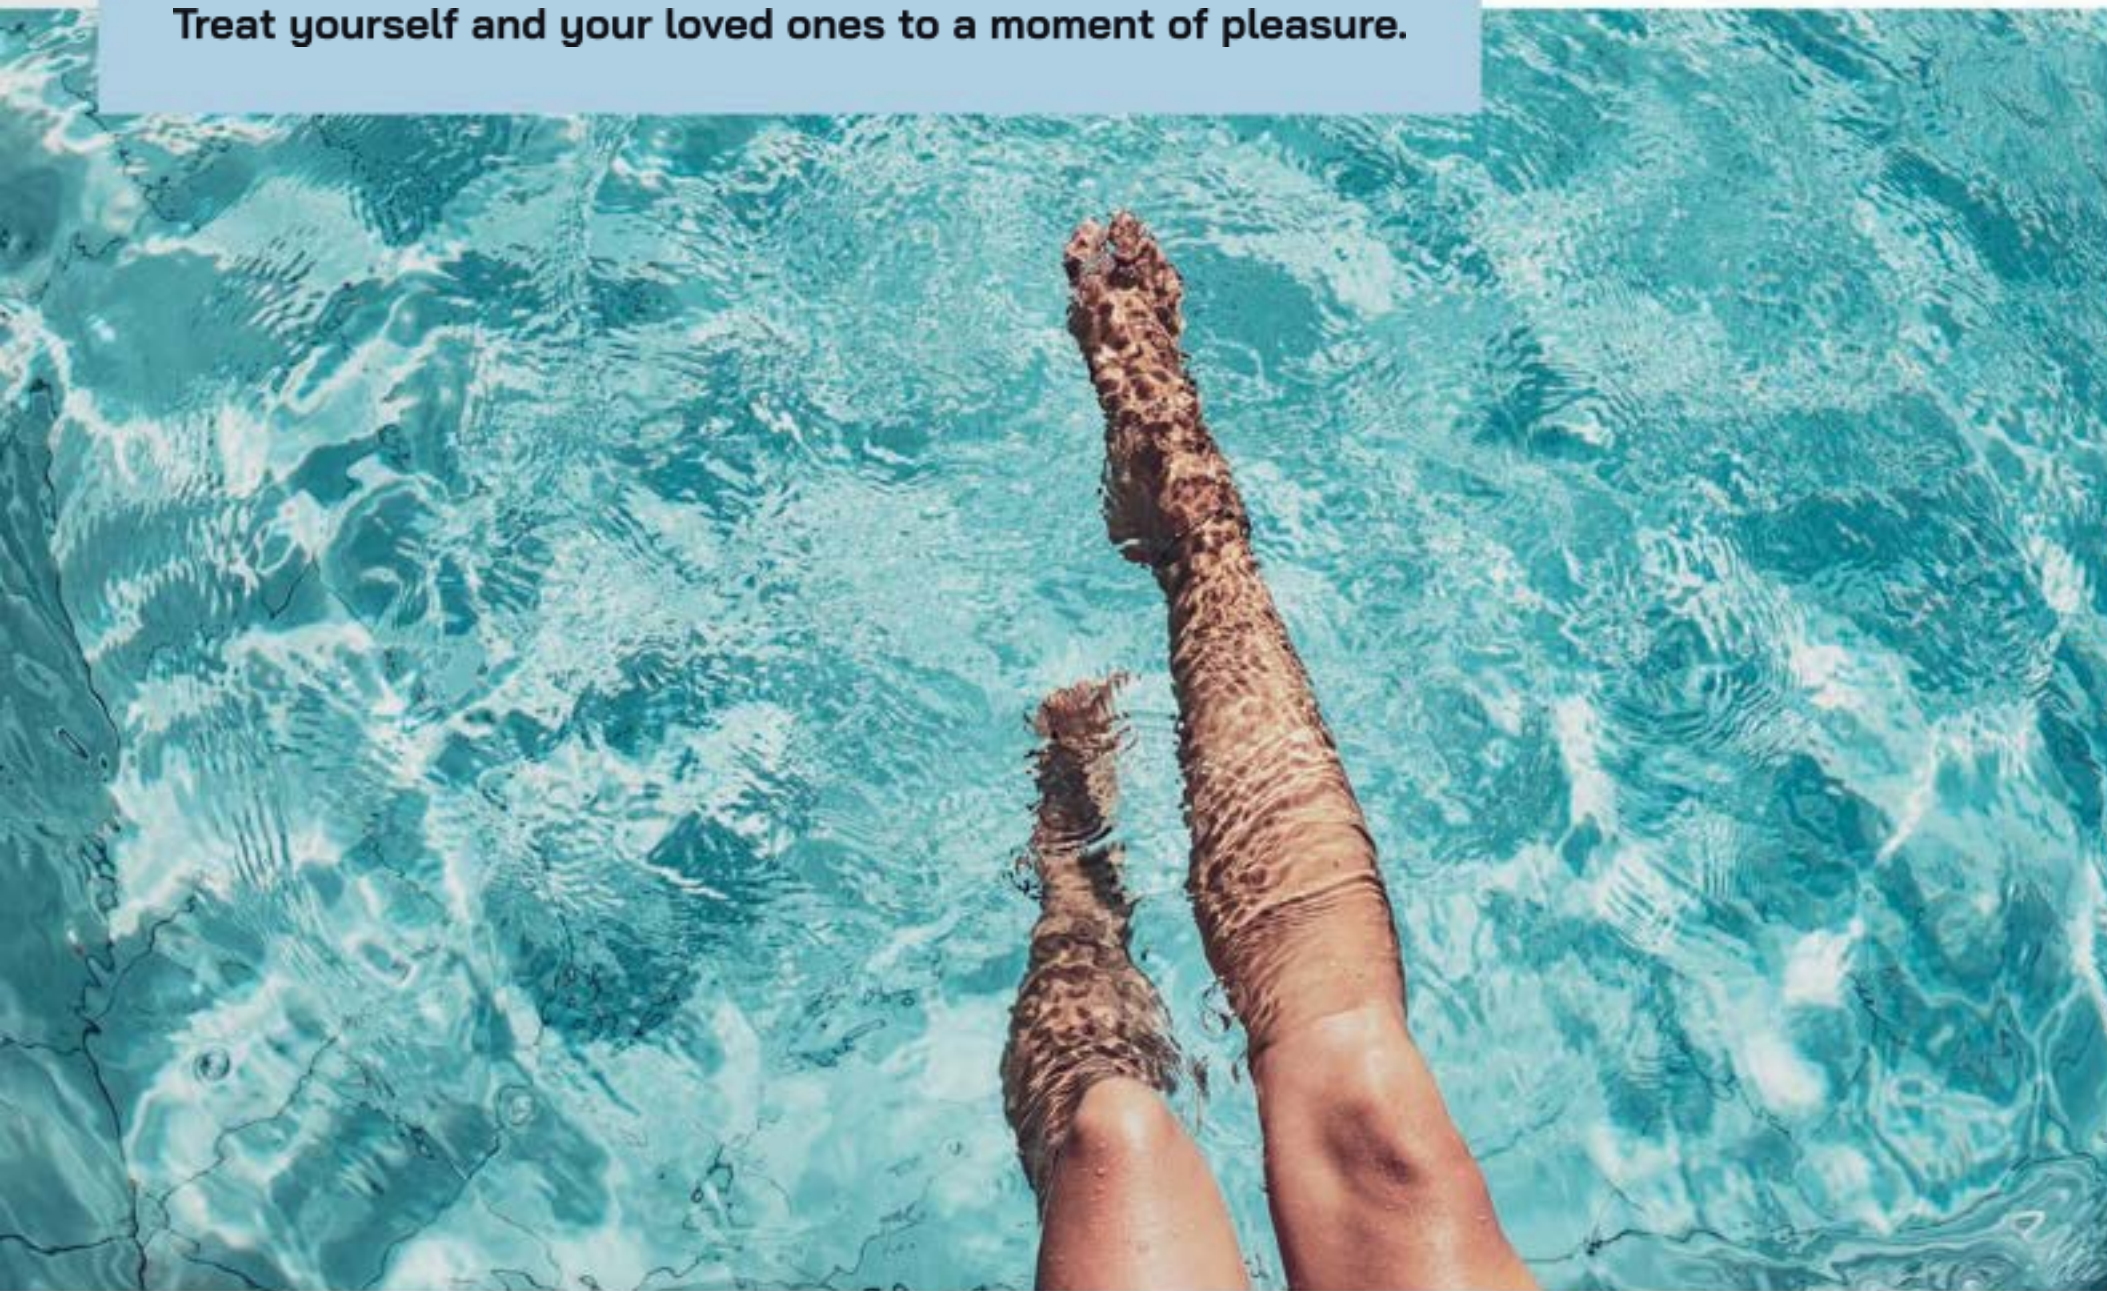

Colours available

Advantages of roller blind:

- ✓ maintains a higher water temperature,
- ✓ protects against impurities,
- ✓ reduces water evaporation,
- ✓ eliminates dangerous situations involving children, animals and even adults

Treat yourself and your loved ones to a moment of pleasure.

Europool 0100001

Enclosures

The enclosure is the best way to protect your swimming pool. Each product is selected according to the client's preferences to satisfy them with the completed project. The satisfaction and joy of the buyer are our priority.

Possibilities of enclosure configuration:

- ✓ roofing in a box or assembled on a pallet,
- ✓ solid pk3, pk4 or chamber pk8 filling,
- ✓ profile colors: anthracite DB 703, gray RAL 9007 and black RAL 9004,
- ✓ door: right, left, in the front wall,
- ✓ a door knocker necessary in case of choosing a water curtain or a water curtain (excludes the use of a door in the front wall)

Advantages of a pool enclosure:

- ✓ complete security,
- ✓ protection of the swimming pool against UV radiation,
- ✓ reduction of water evaporation,
- ✓ maintaining the proper PH level,
- ✓ limitation of water cooling,
- ✓ extend the service life from early spring to late fall.

Filter box

The filter box is a comprehensive solution for installing all filtering technology. It finds it's application when installing devices in a basement or a wooden house is impossible

The filter box is made of durable materials, which we use to produce our pools.

Technical box small

Dimension: 1,41 x 0,84 x 0,71m

Technical box medium

Dimension: 1,45 x 1,11 x 1,07m

Technical box medium double

Dimension: 1,93 x 1,11 x 1,07m

Technical box big

Dimension: 2,17 x 1,70 x 1,23m

Technical house

We recommend building or purchasing a ready-made, free-standing technical house on a stable, hardened surface. The integrated filtration is easily accessible and comfortable for the user. Garden houses perfectly protect devices against possible rainfall.

Filter box for pool

Basin equipment

Nozzles

They enable the return of purified water from the filter to the inside of the pool. Nozzles can be made of two materials: white ABS (we can paint it in the color of the pool) or stainless steel.

Skimmer

Takes water from the pool to the inside of the filter collecting small impurities (leaves, insects, etc.) from the water surface into a special basket. The skimmer is available in two variants: white ABS (we can paint it in the color of the pool) or stainless steel.

Lamps

Underwater lighting is a crucial element of the pool basin equipment. The number of lamps is selected individually according to the customer's preferences. The cover can be made of white ABS (we can paint it in the color of the pool) or of stainless steel. The bulb is available in the primary option of 300W or the LED version.

The bottom drain

Allows easier drainage of water from the inside of the underwater roller shutter chamber to the outside. The bottom drain can be made of white ABS or stainless steel.

Pumps and filters

Sand filter

Is one of the essential elements of the pool technique used to keep the water clean. Special sand or glass is placed, with the help of which all impurities are removed from the water surface. Filters come in various sizes, depending on the basin's dimensions.

Filter pump

The primary function of the filter pump is to draw water into the filter and release it back to the pool. It's a basic element of the swimming pool technique, without which its proper functioning is impossible. They come in various variants, and their size depends on the size of the pool.

Water purifying

Automatic chemical dosing station

A correctly set device will completely independently dose the correct dose of swimming pool chemicals into the water and allow us to control the current level of preparations in the basin.

Salt ionizer

Is an alternative solution for chemical dosing stations. This device converts salt into chlorine in the process of electrolysis.

UV lamp

Supports water disinfection using UVC radiation. It does not add additional chemicals to the water

Water heating

Heat pumps

The best and most effective way of heating swimming pool water from spring to autumn. The disposable device maintains a constant temperature in the basin throughout the bathing season.

Heat exchanger

We can use this device when the house is heated with a gas or oil stove. The exchanger is connected to the central heating system, heating the water to the appropriately selected temperature.

Accessories

Automatic vacuum cleaner

Moves independently around the pool basin, cleaning every possible place - from the floor to the walls.

The water curtain

Gives the user a remarkable waterfall effect, perfect for relaxing. At the same time, it minimizes fatigue and improves well-being.

The jet swim

Is a device for active users of the swimming pool. The jet swim pump produces a powerful stream of water, which enables intense swimming practically on the spot.

Swimming pool technology

Your own luxury pool

Pool installation

We offer complete installation services from preparing the excavation, ordering the crane, making the bottom plate, as well as filling the pool with semi-dry concrete and connecting the pool filtration. In addition, we provide professional finishing of terrace surfaces with exotic wood.

Transport

Our transport fleet consists of new delivery trucks and specialized trailers for transporting swimming pools. At the same time, our qualified drivers guarantee safety and timely delivery of the transported product.
